May 3, 2013

## Merchandise Trade

### *Export growth continues*

The value of Alberta's merchandise exports exceeded last year's levels for the third consecutive month in March. Exports totaled \$8.7 billion, up 1.4% over the same month last year.

The export gains were fairly broad based. Energy products (+0.6%), the largest export category, and farm, fishing and intermediate food products (+5.3%) led the gains. Exports of metal and non-metallic mineral products posted the largest loss, falling 21.3%. Industrial machinery, equipment and parts exports also fell slightly, but at a much slower rate than in February.

Nationally, the merchandise trade balance moved from a \$1.2 billion dollar deficit to a \$24 million surplus as exports grew at a much faster rate than imports.

## Rigs Drilling

### *Rigs drilling continues to trend downwards*

Rigs drilling in the province continued to trend below the 2012 level in April, posting the eleventh consecutive year-over-year decrease. The average number of active rigs in Alberta was 115 in April, down 18.2% from the same month last year. Despite recent decreases, monthly rigs drilling continues to remain above the five year average.

## Bankruptcies

### *Business and consumer insolvencies continue to move lower*

In February, both business and consumer bankruptcies fell compared to February 2012. A total of 14 business bankruptcies were reported, down 44.0% year-over-year and below the 12-month average of 17.

Consumer bankruptcies dropped to 412 in February, down 22.7% from the same month last year. After hitting a peak of 1163 in September 2009, there has been a strong downward trend in consumer bankruptcies.

## Canadian Real GDP by Industry

### *Strong growth to start the year*

Real GDP in Canada increased by 0.3% in February, matching January's growth rate. The expansion was led by the mining, quarrying, and oil & gas extraction industry, which jumped 2.2%. The increase was largely due to a 6.4% increase in the mining industry, though conventional oil and gas extraction saw a healthy 1.2% increase after falling in the previous two months. The non-conventional oil extraction industry expanded for the third straight month (+0.6%).

## US Employment

### *Markets rally on strong jobs numbers*

The US economy added 165,000 jobs in April, and the unemployment rate ticked down 0.1 percentage points to a post-recession low of 7.5%. In addition to the April numbers, estimates of changes in non-farm payrolls for February and March were revised up by a combined 114,000 jobs. The S&P 500 increased 1.1% on the news, becoming the last major US stock exchange to eclipse its pre-recession peak.

## European Economy

### *ECB lowers interest rate*

For the first time since July 2012, the European Central Bank cut its benchmark interest rate by 25 basis points to a record low of 0.5%. The move comes after the unemployment rate hit a record high in March and inflation fell to 1.2% in April.

## Alberta International Merchandise Exports
