

Domestic Fishing Licence Conditions for 2019-2020

This document and the rules within are effective April 1, 2019

Fishing with gill nets

Gill nets can be lawfully set by licenced users (i.e., First Nations people, Métis harvesters, and researchers).

Nets must be visibly marked at each end with a 1 metre stake or spar buoy bearing the applicable licence number. See General and Specific rules for gillnetting below.

If the nets are not marked, or the presence of a net seems suspicious (for example, set during a closed season), please call your local Fish and Wildlife Office or Report A Poacher at 1-800-642-3800.

Specific rules for gillnetting

See list and maps of waterbodies below with specific rules for gillnetting.

If a waterbody is not identified on the list below, it is not eligible for gillnetting under the authority of a Domestic Fishing Licence.

General rules for gillnetting

1. No gillnetting in waters closed to all fishing.
2. No spring closure unless specified for a lake or river. See table starting on page 3.
3. A single gill net of no more than 95 metres (104 yards) in length of the specified minimum mesh size (not less than or NLT) listed for the lake or river.
4. No person fishing under the authority of this licence shall fish within 50 metres (55 yards) of the mouth of any tributary to a lake or river in which the person is fishing.
5. No person shall set, operate or leave unattended any gill net unless it is marked at each end,
 - a. where the person is fishing through the ice, with a stake the top of which is at least 1 metre above the ice and snow; or
 - b. where the person is fishing in open water, with a spar buoy the top of which is at least 1 metre above the surface of the water; and
 - c. each required stake or spar buoy shall be marked, in solid block numbers without ornamentation and not less than 20 mm in height, with the number of the Domestic Fishing Licence.
6. When cleaning and transporting fish,
 - a. fish cleaned for storage not at your permanent residence or for transport to your permanent residence must not be skinned, cut or packed in a manner that,
 - » the species cannot be identified,
 - » the total length of every fish subject to size limits cannot be measured, as fish can also be harvested by rod and reel.
7. Fish that are not subject to size limits maybe filleted but enough skin must be left on each fillet so species can be identified.

Remember: When cleaning fish away from your permanent residence, DO NOT REMOVE evidence of species **unless the fish are being consumed immediately.**

Fishing with rod and reel (angling)

Specific rules for angling

See list and maps of waterbodies below with specific rules for angling.

If a waterbody is not identified on the list below, it is not eligible for angling under the authority of a Domestic Fishing Licence.

General rules for angling

1. No fishing in waters closed to all fishing.
2. **General Spring Closure** – April 1 to May 14, unless otherwise specified for a lake or river. See table starting on Page 3.
3. No use of live fish, frogs, salamanders, or crayfish as bait; no possession of live fish or crayfish unless the fish are within 5 metres (16 feet) from waters from which they were caught.
4. No angling within 23 metres (25 yards) downstream of any fishway, canal, weir, dam, obstacle or leap.
5. No unattended lines; licence holder may not be further than 30 metres (33 yards) from any line in the water.
6. No daily harvest quota or possession limits.
7. No harvest permitted of bull trout, Athabasca rainbow trout, Arctic grayling, lake sturgeon and westslope cutthroat trout.
8. **Default size limits for walleye and northern pike** – No harvest of walleye under 50 cm total length and no harvest of pike under 63 cm total length, unless otherwise specified for a waterbody.
9. When cleaning and transporting fish,
 - a. Fish cleaned for storage not at your permanent residence or for transport to your permanent residence must not be skinned, cut or packed in a manner that,
 - » the species cannot be identified,
 - » the total length of every fish subject to size limits cannot be measured.
10. Fish that are not subject to size limits (for example lake whitefish) may be filleted but enough skin must be left on each fillet so species can be identified.

Remember: When cleaning fish away from your permanent residence, DO NOT REMOVE evidence of species and evidence of length if size limits apply, **unless the fish are being consumed immediately.**

Consumption Advisory

Health Canada has set fish consumption guidelines based on the concentration of mercury in fish tissue, and the human body's ability to eliminate mercury at a slow rate. Most mercury accumulation in Alberta fish comes from natural sources.

Mercury, an element that occurs naturally in waterbodies and is a pollutant, can be passed through the food chain and become concentrated in fish-eating species such as pike and walleye. Caution should be used with large predatory species such as pike and walleye as they generally have higher concentrations in the liver, kidney, and muscle.

For detailed information about fish consumption advisories, please contact Alberta Health at 1-780-427-4518 or see the MyWildAlberta website and search for 'fish consumption advisory'.

Also, download the portable device App *Should I Eat This Fish?* by Government of Alberta

Buying and Selling Fish is Prohibited

A Domestic Fishing Licence (DFL) authorizes the licensee to harvest fish for food. Fish harvested under a DFL by any means cannot be sold, bought, traded or bartered. The illegal trafficking of fish threatens our fish, is a serious offence, and can lead to substantial fines.

Eligible Waterbodies and Specified Rules

- First Nations (Status Indian Card holders): all waters listed below are available. See maps below.
- Métis Harvesters: See tables below for waters available within your Harvesting Area or Settlement. See maps below.

Specific rules for eligible waters are shown below, in addition to general rules shown on pages 1 and 2

WATERBODY (LOCAL NAME)	LEGAL LOCATION	DISTRICT	SPECIFIC ANGLING RULES	SPECIFIC GILLNETTING RULES	MESH (mm)	CONSUMPTION ADVISORY
