Bulletin # 87

Replacing AADL equipment and supplies due to flooding in Northern Alberta

Clients who have had their AADL funded equipment or supplies damaged or lost due to flooding should investigate replacement of those items through their insurance policies.

Requests for replacement AADL equipment and supplies for clients without insurance will be done by the Quantity and Frequency Review (QFR) process. AADL authorizers need to indicate “replacement due to flooding” on the QFR form.

Clients should contact their authorizers to complete the QFR form. If they do not know how to contact their authorizer, they can call Health Link at 811 to find an authorizer in their area.

If you have damaged respiratory equipment, please contact your respiratory supplier for further information.

Short term equipment loan options may be available through the Health Equipment Loan Program in your local area.
